Mr. J. L. Petty, Jr., Acting Director
Hazardous Waste Remedial Actions Program
Martin Marietta Energy Systems, Inc.
Post Office Box 2003
Oak Ridge, Tennessee 37831-7606

Dear Mr. Petty:

SUPPORT TO THE ROCKY FLATS SOLAR EVAPORATION PONDS PROJECT

The Rocky Flats Field Office (RF) has requested that the Hazardous Waste Remedial Actions Program (HAZWRAP) provide technical advisory support for checkout and startup of Building 910 evaporators and modular surge tanks to accelerate the removal of liquids from the Solar Evaporation Ponds, Operable Unit 4.

I have discussed this request with Frazer Lockhart to clarify what HAZWRAP's role would be. We agreed that in performing these advisory activities, HAZWRAP will be providing its technical and project management judgement. HAZWRAP will not make any engineering certification that system designs will work or assume responsibility for achieving the startup schedule, or meeting compliance milestones. Those responsibilities will remain with RF and its contractors. HAZWRAP will interface with RF contractors and subcontractors as appropriate in performing these tasks, but will not be authorized to direct the RF contractors or subcontractors. The enclosed Statement of Work (SOW) reflects these understandings.

HAZWRAP is authorized to provide the support as described in the enclosed SOW. Costs for this effort are estimated at \$352,000 and are funded under ADS 8306. Work may begin utilizing existing funds in this ADS. Replacement funding is to be added to the ADS in the June 1993 Headquarters financial plan.
